How to use CCS films and discussion guide?

The discussion guide contains a number of questions under each short film. You can use them for personal reflection and / or to guide small group discussions.

You may choose to screen just one short film and follow the discussion questions under that section, or you may screen all the films and simply select a few of the questions from the whole list.

Note that the questions are merely a guide so you are welcome to choose just 1-2 relevant ones for your event purposes, or create a few additional ones of your own.
